Wiflex

Your WiFi onboarder

CLOUD-BASED SOLUTIONS

to onboard your visitors and employees
secure and easy on the WiFi

Wiflex – Your Cloud-based WiFi onboarder

Cloud based solution to onboard your visitors and employees easy and secure on the WiFi.
3 products (BYOD Module, One click and Visitor Registration)

#01
BYOD

Employees can easily onboard their devices securely on the network.

#02
One click

With one push on the tablet you generate an unique and secure WiFi password for your visitors.

#03
Visitor registration

Visitors check-in on a tablet and automatically receive a visitor badge and a secure WiFi password.

BENEFITS:

- Cloud based
- Ease of use for the end user
- Affordable

- Secure WiFi Solution
- Very Easy to configure
- Multi-Tenant

Disadvantages of existing solutions

1 | Existing solutions are very expensive and complex (certificates, app install, radius,...)

2 | Mostly they require extra hardware and changes on the network

3 | Extra IT resources needed to configure and maintain the solution

4 | Most of the public WiFi is unsecure and a big threat to everyone who connects

#01

BYOD (Bring your own device module)

Employees can easily onboard their devices securely on the network. They need to login ones with their Azure AD/Office365/Gsuite credentials and get a secure and unique WiFi password. This WiFi password automatically linked to the right security group (vlans, QoS,...). When he/she leaves the organization, the WiFi code is automatically disabled.

How does it work?

STEP 1: Register yourself on the portal with your Azure AD/Office365/Gsuite credentials.

STEP 2: Wiflex will check if you have the rights to receive a WiFi password. If you are granted we will create a WiFi password assigned to the right security group

STEP 3: We will provide you the unique and Secure WiFi password

STEP 4: You can connect to the secure WiFi network

Login
Easy login on the WiFi network with your Azure AD/Office365/Gsuite credentials

User Groups
Assign rights, vlans,... based on the user groups from Office365/Azure AD/Gsuite

Deactivation
When someone leaves the company the WiFi code is automatically disabled

Monitoring
Monitor your WiFi network on user level

Security
Secure solution with Personal WiFi passwords

#02

📱 One click

With one push on the tablet you generate an unique and secure WiFi password for your visitors. Visitors can easily onboard them self with scanning a QR code. No unsafe Public WiFi networks anymore!

Only thing you need is an Ipad and a Kiosk/Ipad holder.

✅ **Own Branding:** Full wrapped Kiosk in the colors and layout of your company

👍 **Customizable:** You can adjust the colors, logo and layout of the application so it matches with the identity of your company

🔒 **Security:** We create a time-based, unique and secure WiFi password in the right Security group

✔ **Easy onboarding:** Just press a button and scan a QR code and you are ready to go.

🖨 **Printing:** You can also print out the WiFi password to onboard your laptop

☁ **Cloud-based:** You can manage the application from a cloud platform

EASY VISITOR REGISTRATION

#03
🔲 Visitor registration

Only thing you need is an Ipad and a Kiosk/Ipad holder.

Next level visitor registration connected with your WiFi. Visitors check-in on a tablet and automatically receive a visitor badge and a secure WiFi password. The host receives a message that his visitor is at the reception. You always have an overview of the visitors in your company.

˅ Easy visitor registration
Visitors check in and out very easily with a tablet. Less work to assign to your receptionist!

˅ Visitor overview
You have a live insight on your visitors. You can view this list on your mobile phone or on your computer. Very useful when an evacuation takes place.

˅ Secure Guest WiFi
Every visitor receives an unique and secure WiFi password. The visitor can easily connect to the WiFi network by scanning a QR code.

˅ Push notifications
The host receives a notification when their visitor is at the reception.

˅ Advanced back-end
Within the WiFlex portal you can check-in your visitors (manual or in bulk). You can change the layout and your preferences. The WiFlex portal is cloud based.

˅ 100% customizable
The portal is fully customizable in your own corporate branding. You can also chose which fields of information the visitor is mandatory to complete.

˅ Customizable badges
At a visitors check-in a visitor badge is automatically printed. You chose which data is printed. The WiFi password can be printed as well.

˅ Bulk registration
In the back-end you can easily onboard multiple visitors. Perfect use for groups.

**˅ Airprint**
Easily print your guest badge and/or WiFi password

˅ Azure AD/Office365/Google Gsuite integrations
Import your hosts from Azure AD/Office365 Import your hosts from Google Gsuite

˅ Reports
WiFlex provide advanced vistor reports. How many visitors today, how many still in the building, ...

And many more features (see website)
